Pain Management Center at Galion Community Hospital Welcomes New Provider

GALION – August 25, 2011 – Galion Community Hospital is announcing the addition of Holli Ujvari, CNP, to the Pain Management Center located on the hospital campus at 269 Portland Way S in Galion. In addition to caring for patients in the Pain Management Center, Ms. Ujvari will continue to provide family medical care to adults and children five years and older along with Dr. James Goudy in Galion where she has practiced for the past year.

Ms. Ujvari served as an RN for over five years while attaining her American Academy of Nurse Practitioner's board certification as a CNP. Ms. Ujvari received her Master of Science in Nursing through the Family Practitioner Program at Otterbein College in Westerville, Ohio. Her undergraduate Bachelor of Science in Nursing was achieved through MedCentral College of Nursing in Mansfield and her Bachelor of Science in Environmental Health from Bowling Green State University.

"I'm excited about working with Dr. Robert Gould and Dr. Ripal Parikh in the Pain Management Center at Galion Community Hospital, and to provide care to the residents of Galion and surrounding communities," said Ms. Ujvari. "I look forward to building lasting

relationships with patients and helping return them to a happy and productive life uninterrupted by pain.”

A Certified Nurse Practitioner (CNP) is a registered nurse (RN) who has completed advanced education (a minimum of a master’s degree) and training in the diagnosis and management of common medical conditions, including chronic illnesses. CNPs provide a broad range of healthcare services and maintain close working relationships with physicians. CNPs spend quality time with patients in an effort to learn which treatment options are best for them. CNPs often serve as a patient’s regular healthcare provider.

About the Galion Pain Management Center

The Pain Management Center at Galion Community Hospital offers diagnosis and treatment of conditions such as neck and back pain, headaches, arthritis, reflex sympathetic dystrophy, nerve damage, muscle pain, pelvic pain and more. Treatments used to treat pain sufferers include discography procedures to the cervical, thoracic and lumbar vertebrae, epidural injections, facet joint and myoneural injections, selective nerve root blocks, lumbar sympathetic blocks, nucleoplasty and others. Pain Management physicians and clinical staff are trained to provide the most advanced treatments in the management of pain. For more information, or to schedule an appointment, call 419-462-4547. Physician and self-referrals are accepted.
